

Lab 2 Errata

If npm search is down, ie you get an error in the composer playground **Error: could not get any sample networks.**

Do one of the following:

1. Run the composer playground using the following URL (preferred):
 - a. <https://composer-playground-unstable.mybluemix.net/>
2. Download the Car Auction bna file from here:
<https://ibm.box.com/s/6v7yanx5ph67xqsic0baynwmqqzx3usc> and in the playground in the browser, click the browse link and select the bna file. The file will be downloaded into the /home/blockchain/Downloads directory and will have the name carauction-network@0.2.6.bna
3. Clone the composer-sample-networks project and generate the bna file
 - a. `cd /home/blockchain`
 - b. `git clone https://github.com/hyperledger/composer-sample-networks.git`
 - c. `cd composer-sample-networks/packages/carauction-network`
 - d. `composer archive create -t dir -n .`
 - e. In playground in the browser, click the browse link and select the generated .bna file in the carauction-network directory

Lab 5 Errata

1. Perform the following for Step 2 instructions:
 - a. `cd ~`
 - b. `curl -sSL https://goo.gl/6wtTN5 | bash -s 1.1.0`
 - c. `cd ~/fabric-samples/fabcar`
 - d. edit the package.json file with the vi editor or VS Code
 - e. **modify** dependencies section so it uses explicit package versions as follows:

```
"dependencies": {  
  "fabric-ca-client": "1.1.0",  
  "fabric-client": "1.1.0",  
  "grpc": "1.10.1"
```
